

## HOW TO MAKE A QUILT SLEEVE

1. Measure the width of the quilt. Cut a strip of fabric that width and about 9 inches in height.
2. Hem the ends of the strip (the 9-inch ends) to secure raw edges.
3. With the WRONG sides together, sew the strip into a long tube.
4. Lay the tube out with the seam line running up the top center, and then iron it flat.
5. Turn the tube over so the seam is on "the back" and position it about one inch from the top of the quilt, on the quilt back. The seam should be hidden between the "front" of the tube and the quilt.
6. Whipstitch the tube to the back of the quilt, being sure to leave the ends open so a hanging rod can be inserted.
